6) If, in the opinion of the Judges, a Rider makes two honest efforts to get out on a chute fighting horse and is unable to do so, he may have a re-ride drawn for him.

Article XVII

c) One hand rigging to be used.

1) Rigging is to be, not over 10 inches in width at hand-hold and not less than 6 inches. (D-ring or not freak).

2) Judges to decide on all rigging if questioned.

d) Stock Contractor will have the right to have Judges pass on whether rigging is objectionable.

e) A leather covered hair pad must be used on the entire underside of the bareback rigging. All equipment must be furnished by Contestant. (Pad to be no thicker than standard hair pad and no wider.)

f) Contestant's spurs must be over the break of the horse's shoulders touching the animal, when the horse's front feet hit the ground the first jump out of the chute. (See Judging Methods)

g) First jump rule may be waived if Rider is fouled on chute gate, at the discretion of the Judges.

h) If a horse stalls coming out of the chute, either Judge may tell Rider to take his feet out of horse's neck and

f) When Judge's vests are furnished, Judges are responsible for the care and maintenance of the same and will wear them during all paid performances of the rodeo in which they judge.

g) Judges will wear white shirts unless shirts are furnished by the Stock Contractor or Committee.

h) Should anything happen to a Judge during the course of a rodeo so that he/she could or would not be able to judge the remainder of the rodeo in the riding events or flagging the field, the Rodeo Secretary will divide the total purse in proportion to the number of Contestants that have finished contesting in each event up to the point the Judge became incapacitated and pay off accordingly. A new Judge will then be appointed and remainder of events affected, judged and paid off as if it were another rodeo with points counting. If a new Judge replaced a Line Judge, his replacement will not affect those timed events.

i) Any Judge who makes an obvious mistake in interpretation of a rule may have a Contestant that is fouled or flagged incorrectly, compete again. This is at the discretion of the Judge only.

j) In all Timed Events, any Judge who flags an event incorrectly will have the option of either giving time or rerun once flagged with the exception of illegal head catch, crossfire, or tie rule.

k) A Stock Contractor/Producer who uses a Judge who is not on the Approved Judge's List will be fined for each offense. In an emergency situation, a Judge may be approved by the BOD on a temporary basis.

l) Any Judge hired may not judge their event at any performance. Rough Stock Contestants may not score their event. Timed Event Contestants may not flag their event for the duration of the entire rodeo.

m) Judges shall furnish and set-up barrier equipment and Barrel Racing stakes unless previous arrangements have been made with Stock Contractor/Producer.

o) Pin ring on barriers must be smooth, solid. O-ring.

p) The following pay schedule will be used as a **minimum** at ACRA first approved rodeos:

1) \$0-\$999 added money per event - \$100 per perf

2) \$1000 and up added money per event - \$150 per performance.

9. Other Personnel:

a) Gate Man Riding Events:

1) Prior to the start of the rodeo, open all gates to see if they open freely and wide enough, (or how wide they actually do open). Discuss briefly the procedures for opening gates.

2) The Gate Man's knowledge about the animals can help prevent fouls, injury, re-rides, and also bring out the best performance from the animals. The animal's pattern of leaving the chute will determine when and how wide to open the gate. In order to prevent fouls or injury to the Contestant or animal, never open the gate to its maximum width until after the animal's initial move out of the gate. Be sure to catch the gate when it's pulled or thrown to its maximum flexibility, to ensure that the gate cannot bounce back and interfere with the animal or Rider. At the first opportunity, when Rider and animal are clear so as not to interfere with either, close and latch the gate.

3) Gate Men should open the gate approximately to a 45-degree angle, leaving additional slack to be taken out (by additional Gate Men) to full gate extension upon action of the animal after its initial move.

b) Gate Man Timed Events:

1) In Timed Events, same man must open gates for entire rodeo. Stock Contractor will designate and be responsible for providing a man and seeing that they work the entire rodeo.

Article XIV

1. Humane Rules:

a) A Veterinarian shall be in attendance or immediately available if at all possible at every rodeo and will examine and treat or recommend disposal of any injured animal after its removal from the arena. When destruction of any animal is recommended, such destruction will take place as soon as possible.

b) If an animal is injured in the process of contesting in the timed events, the Contestant shall not receive another head during that go-round.

c) Calves must be strong and healthy.

d) A pen, corral, or truck bed shall be used only when necessary to receive injured animals removed from the arena with adequate bedding.

b) A Contestant given a re-ride will receive the animal that directly correlates with the order re-rides are awarded in the performance.

c) The re-ride order is unknown to the Contestant, but they may know what animals are in the pen. However, once a re-ride is given, the Contestant deserving a re-ride may know the animal prior to accepting the score or re-ride. After knowing what the re-ride is, if he accepts the re-ride, he cannot later request his original score.

d) Animals mounted out should be in the reverse order of the re-ride positions draw with the first two animals in the re-ride remaining available for re-rides.

e) One Judge shall serve as a Backup Timer to the Bull Riding Event. The Judge's stopwatch reading shall be used as a means of verification when the length of the ride is in question. The Judge shall stop his watch when, in his opinion, the Contestant has been disqualified for any reason or when he hears the whistle, whichever comes first in either instance, the Judge will refer to his watch for a time verification on each ride. In an instance when the time is 8 or more seconds on the Judge's watch, the Contestant shall be entitled to a marking without penalty.

f) Only one Judge on the latch side may use the watch. Both Judges will have to carry a watch if both left and right deliveries are used. The only thing a Contestant has to go by is the whistle. If the whistle is sounded early and your watch stopped on the whistle, but prior to the 8 second reading on your watch, the Contestant is still deserving of his score.

g) A Contestant need not declare on a rough stock animal that falls in order to receive a marking with an option of a re-ride. If the animal falls and he does declare, he is only entitled to a re-ride. He cannot double-down, then turn loose and go on with the ride and receive a marking. If the Contestant does not declare, (accepts the fall), and later gets bucked off, he is not deserving of a marking or a re-ride (you must qualify if you accept the fall).

h) It doesn't matter when the animal stops during the 8 second ride, the Contestant is deserving of his marking with an automatic option of a re-ride if he makes a qualified ride. If outside interference is what gets the animal started again after it has stopped, the Contestant is deserving of a re-ride without having to make the whistle as long as he is qualified up to that point.

i) All bull's horns should be inspected by the Judges prior to their use at all ACRA rodeos (preferably before the draw of the re-ride order and the timed event cattle). If in the

achieve a high marking Contestant must have his toes turned out, spurs touching the animal; and maintain control for the entire length of the ride.

2) A Rider loses points if his toes are not turned out with spurs in contact with the horse; if spurring is not continuous throughout the ride; or if the Rider is not balanced and in control. (Rider's body must be centered over horse not tilted to either side.) Points are gained or lost accordingly to the Rider's rhythm and timing with the horses bucking.

3) Disqualify a Contestant for losing a stirrup; touching horse, saddle, or self with free hand (arm included; changing hands on the bucking rein, or dropping the rein.)

4) The Stock Contractor or the Contestant has the right to call the Judge on whether or not the horse is properly saddled and flanked to buck its best. It is the Judges' responsibility to do so, and to rule fairly and impartially. It is essential that you make a ruling. A Judge who fails to rule on such disputes is failing to handle the judging position.

c) Bull Riding:

1) The Rider should be given credit for the kind of bull he rides, and also how well he rides him. The Contestant should be marked the same as the animal for his ride with consideration for: adding points for good body position and movements; use of free arm or shoulders; and control. Spurring to adjust for the bull's bucking style and to help maintain control. Spurring a bull in the neck is worth more points than spurring behind the shoulder.

2) Staying in the middle of the bull in full control of the ride without being on tilt or reared back is desired and should be scored accordingly. Points should be deducted for a Contestant who cannot maintain control; gets on tilt; or does not stay in the middle of the bull.

3) Winning rides should be on the rank animals when the Contestant shows aggressiveness and control.

4) A Contestant who is sitting up but not trying to protect himself (and not aid his ride) should be given consideration, and possibly not disqualified, for slapping the animal if he is on a bull that slings or throws his head and comes in contact with the Contestant free hand (arm).

7. Rough Stock Re-rides:

a) The designated re-ride should replace any crippled animal prior to the draw of the re-ride order. If not used, the designated re-ride automatically becomes the first animal used in the re-ride order.

e) Humane hot shots shall be used only when necessary. No other kinds of prods are allowed. Absolutely no other electrical devices may be used.

1) In all events, hotshots are to be used from behind the chutes. At no time will a hotshot be used in the arena.

2) Stock Contractors not adhering to this rule will be fined \$25.00 for 1st offense/ \$50.00 for 2nd offense and shall be suspended for 3rd offense.

f) Chutes, corrals, mangers, etc., must be constructed as to prevent injury to stock. All areas in which stock is kept shall be free of rocks, holes, and obstacles. The Judges will determine the safe condition of the above with all maintenance and repair done by the owner of the chutes, corrals, mangers, etc.

g) No Contract Performer will abuse rodeo stock or animals used in their acts in any way.

h) Stock that becomes excessively excited, so that it gets down in the chutes repeatedly or tries to jump out of the chute, or in any way appears in danger of injuring itself, should be released from the chute.

i) All horse flank straps are to be provided with protective lining and shall be of the quick release type. Flank straps are to be fastened on to the animal so that protective lining portion covers belly and both flanks, and shall be kept in good repair. No tacks, spiders, or foreign objects will be allowed on flanks.

j) Use of fireworks on animals is prohibited.

k) Animals will be inspected and objectionable ones eliminated before drawing. No sick or injured animals, whether discovered before or after the draw will be permitted to be used in competition.

l) ANY individual, deliberately abusing livestock on ACRA rodeo grounds regardless of whether the abuse happens during a qualified or unqualified run/ride or behind the scenes, will be removed from the arena or rodeo grounds, disqualified or fired from that rodeo and will be fined.

m) Any member tampering with competition livestock will be disqualified for the remainder of that particular rodeo and may be fined.

n) On a known turn-back animal, roper will select one man to go into arena as far as score line to prevent animal from turning back. Man must not come in physical contact with animal or throw any foreign objects at animal.

Article XV

1. Drawing of Livestock:

a) Numbers will be unfolded, uniform size and will be drawn from a smooth interior round container.

b) No closed drawing of livestock will be held. Rodeo Secretary will post a designated time of drawing. Stock to be drawn for by at least one Judge.

c) All events will be drawn daily, rough stock and timed events and the results of said drawing will be posted at least one hour before the said performance.

1) In all riding events, a complete go-round will be drawn at one time and the results of said drawing will be posted at least 1 hour before the said performance. No more than 2 featured animals may be held out of the re-rides.

2) Judges may draw 1st full run on cattle during 1st go.

3) All stock will be drawn to finish run on cattle before any cattle can be rerun. A head of stock cannot be drawn twice until each has been drawn once, or three times before twice.

d) Stock Contractor has the option of not posting the LOCAL Contestants rough stock draw prior to entry fees being paid.

e) Reruns for slack will not be drawn until after performance and runs will be kept even.

f) No Contestants may compete on the same head of stock twice in the same event at the same rodeo. Should the same animal be drawn, Judges will draw another animal for the Contestant.

g) In events that are more than one round of competition and are back to back, that run two head the same night or before other competitors run their first head, pens must be drawn. First night's pen will be drawn plus extras, then second night's pen will be drawn. This ensures that each competitor will receive a first run on cattle and a second run.

h) All stock must be branded, tagged, or painted with legible numbers that will not wash off before stock can be drawn.

i) If an animal is disqualified from competition after the draw has been made, a new animal will be drawn by Judges for the Contestant. Disqualified animals will remain disqualified for the remainder of that rodeo.

j) An attempt should be made to separate Contestants riding the same horse.

k) Management has the option of giving the number of head or number of runs if less than 15 Contestants are entered in an event.

l) Any current or former riding champion or any current Top Ten Contestant will compete during a paid perfor-

testant by jerking downward on the bull rope (relating to jumping and kicking efforts of the bull).

m) Hops or Walks on Front End: Lands on front feet and walks a step or two before his kick causing whip to the upper body and a very uneven rhythm. Very difficult to ride.

6. Scoring the Contestant:

a) Bareback Riding:

1) Be sure to enforce the no tuck rule. Check to see there is no substance on the glove hand other than dry rosin or benzoin. No rolls or flaps inside or outside the glove or built in leather under the hand hold that would act as a wedge are allowed. Contestants are allowed no more than one wrap of tape on a finger.

2) Many things go to making a good bareback ride. Consider how much the Contestant rolls his spurs toward his rigging and the area the spurs are touching the horse in the neck with toes turned out, as well as timing and length of the spur from the starting position up the neck to the rigging.

3) A perfect ride would find the Contestant positioning his feet high in the neck and rolling spurs toward the rigging. The length of the stroke, drag, exposure, and positioning of spurs should be considered for marking the ride. For exposure, spurs should be away from the horse when repositioning feet for the next jump. A rider that rolls them up the rigging and doesn't throw them out when repositioning feet would be making just a fair ride, the same one that rolls them only half the way up the rigging and then throws them out when repositioning. If a Rider's feet come back to the flat of the shoulder instead of the neck, he should be marked lower. High markings are awarded to aggressive riders with control and exposure.

4) Rider should be penalized for: going to the cinch, getting on a tilt, not spurring.

5) Disqualify the rider who touches the animal, his equipment, or himself with his free hand (including the arm).

b) Saddle Bronc Riding:

1) Points should be awarded primarily for aggressiveness, control, timing, and length of spurring stroke. Timing is a must when a horse changes direction, hesitates, rears, jumps and kicks, or a combination of these. The length of the stroke should be from high in the neck above the break of the shoulders to the saddle skirts. The rider must be aggressive and expose him more to reach the top of the neck (extending his spurring stroke) and should be scored accordingly. To

marking even though it is tough to make a good ride on him, and the poor ride marking will take care of it. Then, if a Rider makes an outstanding ride on a rank, hard to ride horse, he is entitled to win, not be penalized because he didn't draw one of the cream puffs. Remember, horse and Rider are to be marked separately, from 1 to 25, using the full spread.

5. Scoring the Bull:

a) Control and report untipped horns. When judging the bull ride, position yourself so you can see all the action clearly and still be safe. It is impossible to concentrate on the ride, and see how the bull is bucking if you have to run for safety. You will need to maintain a similar judging position for the entire contest.

b) Spinning: Continuous circling in one spot needs speed or other qualities to make the bull difficult to ride.

c) Jumping or Kicking with the Spin: Creates power and is much harder to ride than a flat spinning bull, depending upon the height of the jumps, drops and kicks of the bull.

d) Jumping or Kicking in a Straight Line or a Big Circle: Depending upon how many combinations are involved (shoulder rolls, height of kick, power) can be a very difficult ride.

e) Lunges: Unexpected forward movement with little if any kick. Usually by bull with little or no timing, not spectacular, but very difficult to ride and should be given credit for doing so.

f) Shoulder Rolls: Side to side body movement, could be on the ground or at the top of his jump. A bull that kicks with shoulder rolls increases the difficulty.

g) Rearing and Kicking: Front end comes up abnormally high usually accompanied by a drop, trying to pull you down over his head. Usually by a bull with little rhythm and timing. Difficult to maintain.

h) Rhythm: Smooth, even, consistent bucking motion no matter what his pattern of bucking might be. Sameness throughout the entire ride with coordinated kicks.

i) Fades: Refers to movement sideways, or even backwards, instead of forward. Tends to slide from underneath you.

j) Strength and Power: Front end drop, strong delayed kicking and over effort in bucking along with size, speed and quickness play an important role in the power of the bull.

k) Speed: Rapidness of movement or lack of it.

l) Drop: Vertical drop of the bull's front end as he drives his front feet into the ground creating power on the Con-

mance, rather than after the performance, if management requests.

m) In all Timed Events, it is the Contestant's responsibility to verify that the correct animal is loaded. A Contestant who runs the wrong animal will receive a No Time. Judge will tell Contestant animal's number upon entering box. If Judges calls out incorrect number, Contestant will be given a rerun at Judge's discretion.

n) If, during the performance, it is discovered a Contestant or Contestants have been drawn incorrectly or mis-numbered stock, stock for Contestants from this point to the end of the performance will be redrawn. All Contestants prior to this point who have run correctly drawn stock will receive their times/scores and will not be included in the redraw.

o) Stock Contractor must have a minimum of 10 head of timed event stock to draw from at the beginning of each rodeo unless, there are less than 10 Contestants entered in an event. Then Stock Contractor must bring entered amount plus 1 extra animal.

p) In all Riding Events, no new animal will be put in to the draw, unless previously having bucked.

q) No Contestant shall ride 2 head of stock in the same event during any one performance except for re-rides, unless agreed to by Contestant and Rodeo Officials.

2. Elimination of Livestock:

a) Any Officer or Event Director has the right to declare any stock unsatisfactory, and any stock so declared will be removed from the herd after the conclusion of the rodeo, unless removed prior to the first performance. Said stock shall remain withdrawn until a majority vote of the BOD allows the Stock Contractor to put stock back in the draw.

b) Animals in the riding events may be disqualified from competition for, but not restricted to the following reasons:

1) Being marked by either or both Judges 15 points or below the previous 3 times out in competition.

2) Any animal with a known history of falling or chute fighting, flipping or laying down.

3) Any animal in apparent poor health.

4) If an animal runs off, stops, or falls 3 times in one fiscal year they may be taken out of draw by the Event Director.

c) Objectionable animals in the timed events may be disqualified to ensure an even set of competition animals.

Article XVI

1. Judging Methods:

a) Judges will be on grounds at least 4 hours prior to performances of a rodeo and at least 2 hours before each performance thereafter, unless other arrangements are made with the Stock Contractor.

b) Judges must total own score sheets and remain with Rodeo Secretary until complete payoff is announced.

c) Judges must record Timed Event penalties on recording sheets provided by Rodeo Secretary.

d) When score sheets are posted on master sheet following each performance, a Judge's sheet furnished in the Secretary's package will be posted where it can be seen by all Contestants with livestock drawn and Judge's markings within 30 minutes after each performance and/or slack for each Contestant's inspection.

e) Judge's decisions are final if in accordance with ACRA rules.

f) In all cases of dispute, the rodeo will proceed without delay under the existing rules of the ACRA, and all matter of said dispute shall be settled by the Judges.

g) Decisions of Judges, Flagmen, and Timekeepers will be final and no undue protest by the Contestant will be permitted. Any Contestant arguing or protesting a Judge's decision will be disqualified for the remainder of that rodeo and/or will be subject to a \$100 fine.

h) Faulty Equipment: All equipment used by Contestant is his/her responsibility and no re-rides or reruns will be given due to faulty equipment. Borrowed equipment is accepted as the Contestant's own equipment.

i) Fouls: Anytime a Contestant is fouled in any event, he/she must declare themselves immediately, when fouled, or take that marking or time.

j) Judges' equipment for Rough Stock Events: Throw Flags, Judges' Sheets and Pen, Stopwatch, and Rulebook.

2. Marking Methods:

a) Judges' markings (unofficially) are to be announced publicly after each Contestant's ride or run.

b) Judges' markings are to be from 1 to 25 on Riders and from 1 to 25 on the animal, having a total of 50 points from each Judge making for a possible score of 100 points. The Rider and animal will be marked separately, marking the ani-

throw Rider over the top of the saddle or rigging. The timing of the delayed kick creates a downward power (centrifugal force) on the swells and rigging which is seen in the drop of the rigging or swells of the saddle.

d) Direction Change or Spin: Unexpected change of direction or tight circle.

e) Kicks: Hard kicks, side kicks, uneven kicks, full extended even kicks. Both feet together, high delayed. Creates power, drop, rhythm, timing, rocking and any combination of the above.

f) Speed and Quickness: Rapidness of bucking efforts. More speed, the more jumps and actions in eight seconds (hard to keep up with).

g) Timing: Regularity of the speed, kicking efforts and pattern of the horse's bucking efforts.

h) Rhythm: (much the same thing)

1) Good Rhythm: Smooth, even, consistent bucking efforts.

2) No Rhythm: Changing up jumps, uncoordinated kicks, drop and movement of the horse.

i) Power:

1) Mainly a combination of drop and kick creating stress on the rigging or saddle and jerk on the Contestant. The overall image of the degree of intensity the horse puts into his bucking efforts.

2) It is harder for a Rider to maintain his body control and spurring action on an animal that has a unique bucking pattern. Horses without timing or rhythm with front end moves and ducks are hard to ride and very difficult to spur.

3) A horse that drops in front and does not float out of the air throws much more power at the Rider. The power and strength of the animal's bucking efforts depends on how hard he kicks, lunges, and hits the ground.

4) Speed and quickness of the animal create much more action within the 8 second period.

5) When marking the bucking horses, remember that a horse that ducks and dives is hard to ride and hard to stay in time with so should be marked high even though he does not look sensational in action. When you see one that jumps high, kicks high and has speed and power, don't hesitate to mark a high marking, right up to 25. The high jumping, floating type of horse that is easy to ride is a good draw only because a great ride can be made on him. He is usually just a fair horse.

6) The really hard to ride horse is entitled to a high

3. Riding Event Terminology:

a) Length of Spurring Stroke:

1) **Bareback:** Feet are as far forward as possible and as high in the neck as possible, pulling feet in a straight line to the front of the bareback rigging.

2) **Saddle Bronc:** Extension of the legs as far forward in the neck of the horse as possible. Then in a sweeping motion, back toward the cantle, maintaining continuous spur contact.

b) Exposure: A willingness to go beyond spurring motion, extending oneself beyond secure control.

1) **Bareback:** The distance the feet are away from the horse when repositioning at the end of the spurring stroke.

2) **Saddle Bronc:** A willingness to extend the forward stroke beyond the normal secure position of the spurring motion in the neck.

c) Aggressiveness: Speed of the Rider's feet when repositioning on forward stroke. Positive, forward, forceful movement of the spurring motion.

d) Timing: The positioning of your spurring motion in relation to animal's bucking efforts coordinate efforts in rhythm with each jump.

e) Control: In balance (not out of control). Control of keeping your body in balance with bucking efforts of the animal while exhibiting all the requirements of the ride. Sitting squarely in the middle of the animal with balance.

f) Drag: Continuous spur rowel pressure with the animal through the length of the spur stroke.

g) Spur Position: Rowel against the animal with toes turned out.

4. Scoring the Bucking Horse: Characteristics and Explanation of Bucking Horse action.

a) Front End Moves and Bucks: Horse is changing leads and directions from side to side as if dodging imaginary obstacle. The horse will hit the ground, one foot at a time, causing direct change in the shoulder movement which creates a sideward rocking action in the rigging or swells of the saddle.

b) How High the Horse gets in the Air: How much distance between the ground and horses' front feet. Also, how high the animal kicks. Front end height alone is not enough.

c) Front End Drop: Vertical drop which has no or very little forward motion. It would seem as though the animal is sucking backwards underneath Rider with a strong effort to

mal according to its performance and the rider on how much he spurs the animal.

c) Judges' markings will be final and recorded in ink. There will be no changes. Judges will be subject to a fine per offense for changing markings. (Notation must be made to explain why change, such as: Markings on the wrong line, etc.) Judges : Books must be turned in to the Rodeo Secretary to be recorded on a Secretary's Official Recording Sheet upon completion of each performance.

c) In all Riding Events, Contestant may use his free hand against any foreign subject (pickup men, fences, etc.) that obstructs his ride.

d) No Contestant in an event can flank animals for the rest of the Contestants in this event, unless permission is granted by the BOD.

e) If an animal in a Riding Event comes out backwards, mark out rule to be waived and if Rider is fouled, he must declare himself to receive a re-ride.

f) It is the responsibility of the Judge to see that the Contestants use legal equipment and at any time to ensure that no one is taking advantage of the animal or other Contestant.

g) The rules state that Judge may disqualify a Contestant who is not above the animal with glove on if he has been advised he is next to go. Don't hesitate to enforce the rule. It is essential to keep the Event moving and Judges must help other Officials in getting the Contestant out.

h) To qualify, Bareback or Saddle Bronc Rider must have his spurs over or above the break of the shoulders and touching the horse when the horse's front feet hit the ground on his initial move out of the chute. Some Judges misinterpret this rule. It is not necessary to have spurs over the break of the horse's neck so long as they don't come out or behind the break. Spurs that are rolling above the break should not be disqualified. Too many Riders are rough-locking the horse before he ever moves, causing many horses to stall. The best way to spur one out is to reach for him after he moves.

i) The Spur Out Rule refers to above the breaks, which includes all of the area highlighted in gray on the horse. See Figure 1 below.

Figure 1

j) The spurs may be rolling in the Bareback Riding Event, but must be touching the animal when the horse's front feet hit the ground on its' initial move out of the chute.

k) The initial move out of the chute may be the following:

- 1) rear out
- 2) run out
- 3) buck out
- 4) step out

l) Time starts not when the horse's front feet hit the initial move, but when the animal's inside front shoulder crosses the plane of the chute.

m) Don't stand too close or behind the gate. Get a clear view of the Rider and the horse at the same time. Don't be late in shouting 'go on' if Rider gets fouled in the chute or the horse stalls. If the Rider gets fouled at the gate, the Judge yelling 'go on' tells the Contestant if he is in shape to try the animal and the mark out has been waived. If Contestant tries his animal, he has accepted the animal, and has no re-ride coming because of the foul at the gate.

n) Even if the Contestant has missed spurring out on your side, continue to watch the ride because the other Official may have waived the 'Spur Out' rule.

o) Be aware of a Contestant getting in a little trouble and jumping off when he is not fouled by the animal.. He may be trying to take advantage of other Contestants by getting a re-ride. This applies to a horse stumbling and falling or bucking into a fence. Treat all Contestants alike.

p) Even though the ride and the animal are marked separately, marking for the ride is dependent on the degrees of difficulty of the animal.

q) Use the full spread, when at all possible and don't hesitate to mark the top of the spread when you see something outstanding by either rider or horse. Not using the full spread shows lack of confidence and expertise on the part of

the Judge. This means you should use low marks (from 5-10) for a poor ride or a sorry animal, and higher markings (from 20-25) for the exceptional performance by animals and/or riders. Low markings on the winning rides defeat the purpose of the scoring system. Be consistent for the entire rodeo.

r) Don't pick out one thing on which to dock a ride. Watch for this or you will forget about the rest of the good or bad points. Train yourself on what to watch for and mark the horse and rider accordingly.

s) Be sure to judge your foot and your foot alone. But if an animal moves to a point where you can't see your foot, you will have to mark him from what you see. If a bull or horse spins and Rider is buried in with your foot and spurring with the other foot, let the other Judge, mark him accordingly for an outstanding ride, even though your side was only fair.

t) Anytime one Judge's view is blocked for very much of the ride, he should refer to the other Judge's markings for the animal to see if the ride was consistent while his view was blocked. In some cases, if a Judge doesn't get to see very much of the ride, he should disqualify himself and use the other Judge's markings.

u) Judge the full 8 seconds of the ride. If an animal starts and then stalls for any length of time, mark the animal and Rider for what they have done. If the animal stalls 4 seconds and bucks 4 seconds, only mark him for 4 seconds. Notify the Rider of his marking with the option of a re-ride. Don't base your markings on the last part only. Consider the full time of the ride.

v) Contestants do not necessarily compete in the same order as the Judges' sheets, so make sure you have marked the correct Contestant and animal.

w) Refer back to your books, especially at rodeos with several performances, to refresh your memory about the rides. Don't let the Saturday night crowds or last performance Contestants win simply because of when they drew up.

x) Be sure to mark the animal and Contestant only for their efforts. Don't be fooled by dramatic actions of Contestants or by movement of chaps or other equipment used to make the ride or animal look good.

y) Don't let Announcer, Stock Contractor, Spectators, Contestants or anyone else influence your decision. Animals, just like Contestants have good days, so score them both on how they perform today, when an un-ridden animal gets ridden, it is no sign that the Contestant should automatically win or even place.
